You will automatically be sent an email to inform you when someone has reacted to your question. Please make sure that the part number below matches the number in the information box on your tool. If the part number below does not match the one on your tool, please use our spare parts catalogue to search directly for the part you require. Please try again. Please try again. Users can also employ the GLL 380 to set right angles for square. The GLL 380 has a secure transport lock that protects the pendulum when the unit is switched off. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. Register a free business account Please try your search again later. Lay it out right, right away. It self-levels and indicates out-of-level condition and locks when switched off. Laser is great for marking, alignment and leveling indoors, with a range of up to 65 Ft.

If the operator is working in bright light conditions, the receiver locates the laser line so the user can get the job done, indoors or outdoors. The GLL 380 has a secure transport lock that protects the pendulum when the unit is switched off. Manual mode lets the user lock lines for use at any angle. With Bosch measuring tools, users are able to work smarter, not harder. With the smart level pendulum system the unit self-levels and indicates out-of-level condition and the secure transport lock protects pendulum when unit is switched off. This kit includes the Bosch LR2 Line Laser Receiver. The LR2 assists with quick and accurate leveling applications. Includes 1 Three-Line Laser, 1 WM1 Positioning Device, 1 LR2 Line Laser Receiver and 1 Hard Carrying Case. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Carl 5.0 out of 5 stars The whole kit with the case is really nice, and the case isn't an oversized blob of plastic. I was not really impressed with the intensity of the red lasers. The room would have to be pretty poorly lit to see the beam at the claimed 65 feet. Any sunlight will wash out the beam. I own that PLS product and have no problems seeing the beam indoors, even in sunlight. If PLS made a comparable product to this Bosch with a red laser, I would buy it. I hope that the comparable DeWalt is better in the visibility department. This is my second Bosch GLL380 laser that I've owned. I had my first one for 5 years until it was stolen. I work in construction in very dusty conditions, and this laser never failed. That's why when it got stolen I just had to have the same one. Expensive later but worth every penny. This is the only laser you need it does everything. Sorry, we failed to record your vote.
