Information about products that generate electrical noise If applicable, this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, this is no guarantee that interference will not occur in a particular installation. Note Unauthorized modification of the receiver or radio remote control could void the user's authority to operate this equipment. This product complies with the Canadian ICES003 Class B specifications. This will provide some protection against voltage surges and buildup static charges. Refer to the antenna grounding illustration on this page. Dansk Deutsch Fran c ais Although the sound mix varies with different types of programs, dialogue is usually sent to the center speaker while sounds from the left or right side of the picture go to the left or right front speakers. Ambient sounds and special effects are directed to one or both of the surround rear speakers. At any point in surroundsound performance, you may hear sound from all or just a few of the speakers. The special settings for Dolby ProLogic and Dolby Digital receivers are described on page 13. You can also enjoy a wide variety of stereo programming that is not surroundencoded with your Acoustimass 10 Series II speakers.

Simply adjust your receiver accordingly. Repack everything in the original carton and contact your authorized Bose dealer immediately. **WARNING** The Acoustimass module weighs 28.7 pounds 13 kg. Use good lifting practice to avoid injury. **WARNING** To avoid danger of suffocation, keep the plastic bags that wrap these speakers out of the reach of children. The left and right front speakers create a sound image wider than the screen that seems natural to viewers sitting anywhere in the room.

The surround speakers add subtle sounds and special effects that expand the visual image, bringing the viewer into the center of the action. The surround speakers should be positioned to allow the sound to reach the viewer from both sides, rather than from directly behind. You can place the front and center speakers near a TV screen with no picture interference, because all of the cube speakers are magnetically shielded. You can use any of the five cube arrays at any location. The Acoustimass module is not magnetically shielded and should be at least 2 feet (.6 m) from your screen, but at the same end of the room as the front and center speakers. See "Accessories" on page 15. Note Please follow wall bracket instructions carefully. Proper mounting will insure optimum performance from your system. Figure 2 One suggested home theater layout Selecting the locations for your speakers The cables provided with your Acoustimass 10 Series II system vary in length, allowing a great deal of flexibility in speaker placement. Use the following placement suggestions as general guidelines. Choose convenient speaker locations that give you good sound. Left and right front cube speakers Figure 3 shows suggested ways to achieve an accurate left and right sound image. CAUTION If you are placing the center speaker on top of the television, use the smaller of the two sets of four rubber feet provided. This will also provide extra stability on surfaces such as marble or glass.

Ask for Part Number 17832104. Figure 4 Suggested choices for center speaker placement After selecting a place for the Acoustimass module, attach the larger set of four rubber feet to the bottom surface for additional stability. The feet protect the cable connections and must be mounted when the Acoustimass module is standing on that end. 1 2 3 1 2 3 Figure 6 Acoustimass module positions Separate these wires just enough to reach the connectors. Figure 7 Separating cables Setting Up CAUTION Before making any connections turn off your receiver or amplifier and unplug it from the outlet AC power mains. Not doing so may result in damage to your system. Never connect the cubes directly to a receiver output. Always connect the cube speakers to the Acoustimass module, then connect the Acoustimass module to the receiver. Never use broken or frayed wiring, which can result in electrical shock or damage to your system. The supplied cables are not intended for inwall installation. Check local building codes or enlist a qualified installer. The customer service numbers can be found inside the back cover. Note You can use any cube array in any position. 1. Connect the wire pair marked CENTER to the cube array you have placed in the center speaker position. Press the terminal tab on the back of each speaker. Then, insert the marked wire into the red terminal and the plain wire into the black terminal. Release the tab to secure the wires in place. See Figure 8. 2. Connect the wire pair marked RIGHT to the cube array you have placed in the right front position to the right of the TV as you face it in the same way. 3. Connect the wire pair marked LEFT to the cube array you have placed in the left front position to the left of the TV as you face it. Figure 8 Making cube speaker connections Marked wire to red terminal Release the tab to secure the wires in place. 2. The wire marked LEFT SURROUND connects the module to the left surround speaker.

Press the terminal tab on the back of the speaker to insert the marked wire into the red terminal and the plain wire into the black terminal. Release the tab to secure the wires. Connect the Acoustimass module to the receiver Use the 20 foot (6 m) cable with five pairs of wires to connect the Acoustimass module to your surround sound receiver. 1. Match the wire labels to the SPEAKER OUTPUT labels on the receiver a. RIGHT wires go to the Right Front SPEAKER OUTPUT connections. b. CENTER wires go to the Center SPEAKER OUTPUT connections. c. LEFT wires go to the Left Front SPEAKER OUTPUT connections. d. RIGHT SURROUND wires to the Right Surround rear SPEAKER OUTPUT connections. e. LEFT SURROUND wires go to the Left Surround rear SPEAKER OUTPUT connections. 2. Match the polarity on the receiver. CAUTION Do not connect the Acoustimass module directly to your television unless the television provides surround decoding circuitry and amplified outputs for all channels. Setting Up Incorrect wiring can result in a total loss of Acoustimass module output. Be sure to correct any wiring problems before you plug

your receiver in and turn it on. CAUTION Do not allow exposed wires to brush against each other; this could damage your receiver. Enjoy your Acoustimass 10 Series II speaker system. Figure 10 The module end cover fits over the cables Setting your Dolby ProLogic receiver You must set the volume levels for the front, center, and surround speakers at your receiver. You can adjust these levels at the receiver or with the remote control. Your receiver may have a test tone to help you set volume levels. Instructions for this process vary, depending on the brand and model of receiver you are using. Follow your receiver owner's guide for testing and adjusting the balance of each speaker. For use in video applications, be sure the SURROUNDSOUND center mode setting of your receiver is on NORMAL Figure 11. Speaker Setting at receiver Left and Right Front Large Center Large Left and Right Surround Large LFE low frequency effects ON Subwoofer OFF Crossover frequency 200Hz Bass and treble adjustments Upholstered furniture, wallto wall carpets, or heavy drapes can muffle treble high notes, making your speaker system sound bass heavy. Bare floors and walls and hard surface furniture can make your speaker system sound too shrill. After listening to your speakers, you may want to adjust the balance of bass and treble. You can use the bass and treble controls on your receiver.

Be sure the source material laser disc, DVD, or broadcast programming is Dolby Digital encoded. Customer service For additional help in solving problems, contact Bose customer service. See the inside back cover for Bose customer service offices and phone numbers. Do not allow liquids to spill on or objects to drop into the Acoustimass module or the speaker grilles. You may vacuum the grilles carefully; the drivers are directly behind the grille cloth. No other maintenance is needed. Details of the coverage are explained on the warranty card packed with your speakers. Please fill out the information section on your card. The serial number is located on the Acoustimass module; you may choose to record it on page 3 of this guide. Then, please detach and mail the card to Bose in the preaddressed envelope. Ponch50 5.0 out of 5 stars There were times I would watch a program and the dialog coming from the actors was hard to hear above all the other ambient noises coming from the setting, or the music just didnt sound right because I couldnt quite hear the full instrumentation or the singers voices were being drowned out. The Bose VCS10 Center Channel Speaker enhances those diluted dialogs from your favorite television shows and provdes a crisp audio definition to any instrumentation or vocals that may have been missing from your current home theater package. I highly recommend it!I have owned Bose before and they do make a fine speaker but there prices arent the best.I can finally hear the voice in movies!! There is such clarity and and presence. The music has come into the room. This completes a True Bose setup. I am very happy!Great addition to my Bose 301 Bookshelf speakers. Highly recommend!It is great for mid tones.
