0 out of 5 stars It fits perfect. Plus it has Bluetooth where you can make hand free calls and it does throw out some power to the factory speakers. The only thing was I had to run a power wire to it.Why would they not include the cameraBut good enough for my 16 yo daughter's car. She's happy so I'm happy lolIts a huge step up from any nonbranded factory system, especially the Toyota head unit it replaced in my Tacoma. The sound is good; the interface is simplistic, yet very functional; and the Bluetooth connects without delay. But I got what I paid for; Im not in love. Things that may annoy you TINY volume knob. Buttons would have worked better in the slim space afforded. Fat front frame. The frame around the screen is so thick deep that it causes the stereo to jut out from the Scosche dash kit I used. Looks very jarring. I tried removing the frame, but the screen came with it. You cannot control your phones playlist from the touchscreen. This is pretty astounding. Even my

cheapo, awful, slow, terrible Subaru unit can do this over Bluetooth. That's the biggest reason for the missing star. This is basic Bluetooth functionality at this point. Very disappointing. However, when graded on the curve of the price point, I can overlook the imperfections. The deck itself works fine music still plays and still sounds great but lack of screen renders deck useless.
