The CH1 works well, I am still learning how to get the right sounds for various songs. In all respects It is exactly what I wanted despite the fact that it is well made. Having used other combination effects pedals in the past I can honestly say this pedal being a single effect allows me greater control and its through put to the amplifier gives me a crisp clean sound that allows the full character of my guitar to come through. If you are simply after a chorus effects pedal, I highly recommend you buy one of these. Cancel Thanks, well look into this. All Rights Reserved. CH1 is a very smooth and clean sounding chorus effect, that compliments any clean guitar signal beautifully always works great on overdrive. It works great in mono, but also has a stereo output stereo chorus is always cool. The CH1 also includes an additional function in an EQ knob, which can give give a really strong, bright and shimmery chorus sound, whilst boosting the depth at the same time can create a sound verging on the edge of vibrato. The CH1 is an excellent chorus pedal, offering a flexible modulation which is easy to use. There are many chorus pedals on the market, many with more features, but the CH1 sounds great and can hold its own amongst its competition. Send report Total handling features sound quality State of the Art der penny, 24.02.2014 I bought the Boss CH1 chorus pedal, because I was looking for a chorus effect for my clean guitar sound.

Fast delivery by Thomann, perfect as usual. The pedal is built like a tank, easy to use and it brings exactly this chorus effect, you have heard on so many recordings or live performances. This pedal is used by a lot of professional musicians on their effect board for years. The pedal also works very well on your bass pedalboard. So, I have two of them. One for my guitar and one for my bass. In my opinion, this pedal is state of the art, for years. Send report Total handling features sound quality Great chorus pedal Dub77, 09.06.2020 This is a solid built and great chorus pedal, however, I already own the boss Ce5 chorus Ensemble pedal which is far superior. If you are looking for a chorus pedal, i strongly recommend that you get the CE5 over this as the CE5 allows you choose to put emphasis over bass or treble, and gives the ability to blend these tones. As an owneroperator leased to a carrier, to an extent you're able to set your own hours and take time off when you want. But those freedoms come with a big tradeoff being financially responsible and selfdisciplined. The challenge is great, but the rewards can be, too. If your answer is to work hard, make more money and have a more rewarding life, you have a good chance at success. The successful owneroperator is driven above all else by the prospect of financial payback for time and investment. It's also based on the track record of the last couple of years. Unless the economy hits a bona fide recession, income increases are likely to continue.

If you've been hamstrung since the 2008/10 recession with marginal credit and a truck in need of trading, or if you've been unable to move into a truck for the first time for these reasons, this should be good news. Plan for the hard times when your business is good. Set specific goals. Being dependable means you'll get the loads you need to get the revenue you want. This means being available to carry the loads and being smart in choosing profitable loads. Until you learn the ropes of

owning your business, focus on managing both business and personal expenses. Along the way, you'll be responsible for a lot, such as accounting, taxes, financial goals and your own rules of conduct. A strong financial services provider can provide this assistance and guidance. A good services provider often can save you an amount of money that more than covers the annual service fee. Such a provider should be able to give you all the tools necessary for running a profitable trucking business. These include A good business service can, in effect, give you back that time. A profitandloss statement shows your revenue, fixed and variable costs, net income, contribution margin and breakeven miles. This information should be in an encrypted secure site that keeps your personal information safe. Consider these criteria to make your choice It will allow you to make any necessary changes to your business on a monthly basis instead of at tax time, when it's often too late. Take time to build balance sheets to calculate your net worth. The balance sheet compares your assets with your liabilities. Next, determine how much your equipment is worth. Subtract your liabilities from your assets, and you have the net worth of your business. If it's positive, it becomes an asset on your personal balance sheet. If it's negative, then it's a liability. The difference between your assets and liabilities is your net worth.

Think of it as a road map that allows you to track income and expenses over time, with the goal of reaching your desired financial rewards. A business plan helps you make ends meet. It shows you exactly how much money is needed for expenses, where it will be spent and how much you can afford to pay yourself. It also should provide this complete financial picture in weekly, monthly and annual detail. The process will give you targets, and these can be compared later with your actual financial performance to see where adjustments are needed to maximize profits. All personal household expenses should be included. While your books may reflect a profitable business operation, you may fall short of your personal needs and desires if household expenses are left out. Accumulate three to four months of expenses to reflect your spending habits properly. Don't forget to budget for savings, estimated taxes, unexpected situations and lean times. If there is money left over, place it into savings for emergencies. You may opt out at any time. Check the box and click Signup Now. By design, all Katana amps feature an instantly familiar interface that makes it easy to dial in and save great sounds on the fly. But there's even more power under the hood, and it's all accessible via the free BOSS Tone Studio editor. Read on as we check out all the cool things you can do with this powerful editor for the Katana amp series. Before installing them, carefully read the instructions provided with the downloads. To get a PDF instruction manual for using BOSS Tone Studio with the Katana amps, click on the Support tab at your amp's product page. You can tweak amp tones, load and customize different effects, save and recall Tone Settings, and more. The software directly interacts with the amp, allowing you to intuitively create sounds as you play. Any editor adjustments you make are immediately reflected in the amp, and vice versa.

With fine control of each parameter from 0100, you're able to make microscopic tweaks and dial in sounds to perfection. With BOSS Tone Studio, you can audition and edit these effects, and then load them up in the Katana's 15 available onboard storage locations. You might find this desirable when setting up the effects chain, which we'll discuss coming up. As a general rule of thumb, you'll want to use wahs, compressors, overdrives, distortions, and boosters in front of the amp, and reverb after the preamp. With mod and delay effects, it depends—you might want to use them in either location, depending on the sound you're after. Three different chains are available, as shown in the following image Each effect type has a full set of parameters to adjust, similar to what's available in the GT100, BOSS's flagship multieffects unit. This can be helpful to tame background noise with highgain sounds. It can only be adjusted with BOSS Tone Studio; there are no controls available from the amp's panel. Unlike a simple noise gate, the Katana's noise suppressor intelligently follows the sound's natural decay, so it won't harm the character of your tone. Just click the WRITE button in the upper right corner of the Editor page, give the setting a name, and save it to the desired destination CH1, CH2, CH3, or CH4. Basically, Live Sets provide a way to store and organize Tone

Settings into groups for different gigs, songs, recording sessions, or whatever you want. When you want to load them into the Katana, just drag them to the desired locations in the left side of the screen. Simply click on the TONE CENTRAL button in the lower left corner to browse the many Katana Live Set collections created by top pro players. You're able to audition audio demos of the sounds, and directly add them to your local Katana library. Here, you can adjust MIDI, USB, and device settings, download the latest Katana owner's manual, and more.
